

Technical Data Sheet

FSC RD Powder

Product Description:

FSC RD Powder is a water-soluble re-dispersible polymer powder based on copolymer of vinyl acetate and ethylene.

Application

It's free of any solvents. Interior wall putty / tile adhesive / interface agent / exterior insulation adhesive mortar (FSC RD Powder is good used in adhesive, and it can used to bond the Insulation EPS board, and also can used in tile adhesive, the Filming hardness is moderate)

Specification:

Appearance	White, free-flowing powder
Ash content (1000°C)	12±2%
Bulk density (g/l)	400~600
Residue moisture	≤ 2%
Particle Size (μm)	150μm Tailover ≤ 10%
PH value	6.0-8.0
Minimum film forming temperature	Approx. 5°C
Glass transition temperature	Approx.10°C

Package: 25Kg multi-ply paper bags with polyethylene intermediate layer

Storage: Store in a well-closed container away from moisture and direct sunlight.
